

GENERAL NOTES:

1. Slab & reinforcing designed for soil Class "P"
2. Slab & trench footings to be lined with 200um Polyethylene (Vinyl) sheet (by others)
3. Compact subgrade to 95% and minimum bearing capacity of 100kPa. Deepen with 15MPa binding concrete if required.
4. It is recommended to install jacking nuts under the Post Base Plates and finish off with Shrink Proof Grout. Alternately the base plates can be fixed directly to the slab but this may shorten the life span of the concrete fixings and base plates.
