GX360 Installation & Setup Guide

Manage Public BBQs from Anywhere

GX360 is a plug-and-play unit that lets you monitor and control GX Outdoors BBQs from your smart device.

Expect More Performance

Installation Notes

GX360 Telemetry Technology delivers real-time diagnostics to your smart devices for park asset management.

(1) Turn off power to the BBQ Plate.

(2) Fix the GX360 unit to the wall of the cabinet beside the BBQ Control Box (or as close as possible).

(3) Find a suitable spot to mount the antenna outside the cabinet and drill a 12 mm hole. In areas of excellent reception, the antenna style and placement are not critical. In areas with moderate to poor reception, the antenna should be placed so that the side of the dome is directed towards the closest Telstra cellular tower.

(4) Run the antenna cable to the GX360 unit, using the cable clips to hold the cable in place.

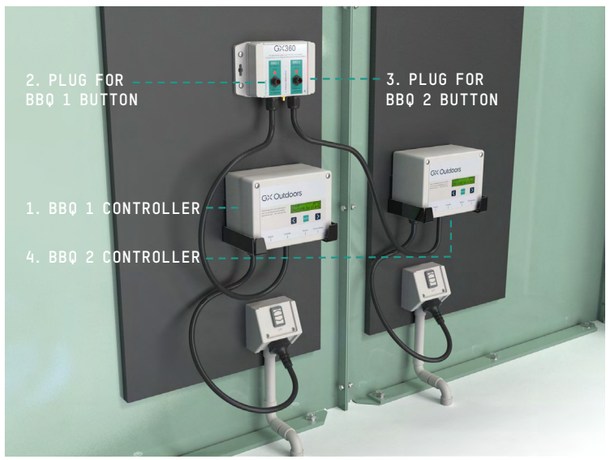

(5) Screw the antenna cable snugly onto the antenna socket, but DO NOT overtighten.

(6) Connect the remaining wires as shown in the photo below.

NOTE: If you are connecting only one plate, use the 'GX BBQ 1' connections on the left side of the unit. Use the 'GX BBQ 2' connection only when connecting two plates in a double BBQ.

(7) Once everything is connected, turn the power back on and wait for the red status light to stop flashing slowly and stay solid red.

(8) You are now connected!

GX360 Website Notes

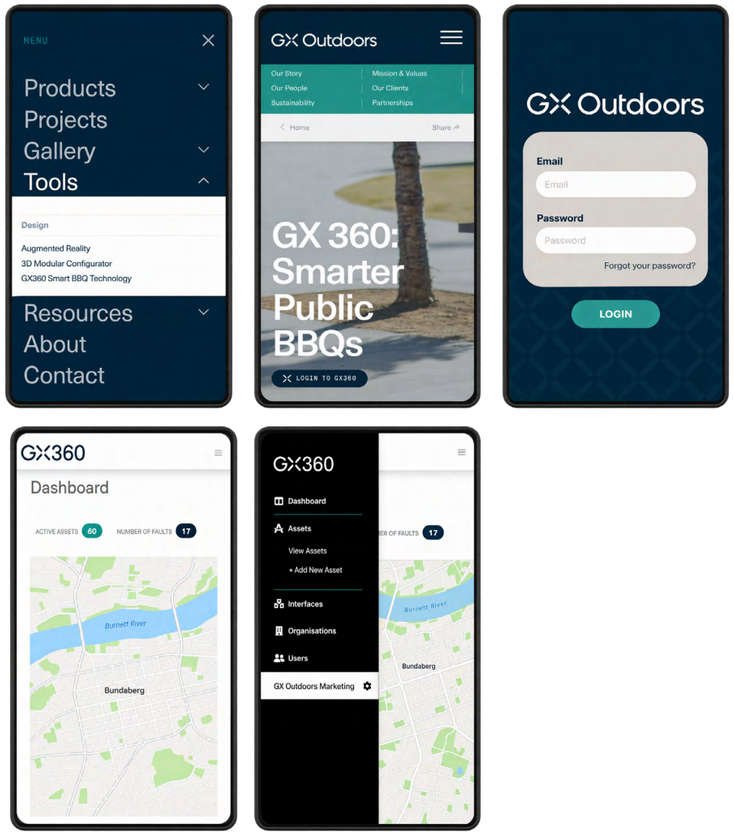

How to access the GX360 website.

(1) Once the GX360 unit is installed and powered up, follow the steps below to set up the dashboard.

(2) On the GX Outdoors website, open the 'Tools' menu and select 'GX360 Smart BBQ Technology'.

(3) When the GX360 page opens, tap 'Login to GX360'.

(4) Tap the three dots in the top-right corner, then tap 'Add to Home Screen'. This adds a shortcut to your home screen for easy access.

How to Set Up the GX360

Interface = GX360 unit, Asset = hotplate

(1) Log in to the dashboard on your phone using the login details supplied to you.

(2) Tap the three lines in the top-right corner to open the menu.

(3) Tap the ‘Interfaces’ tab.

(4) Tap on the matching serial number in the list.

(5) Tap on the ‘add asset to interface’ tab.

(6) Enter a name for the asset, such as ‘Smith Park BBQ Hotplate 1’.

(7) Select Model (GX BBQ).

(8) Select your organisation (already preloaded).

(9) Fill in the custom asset ID (your own vendor asset number). *premium subscription only

(10) Fill in the extension address – 0 for the first BBQ plate, 1 for the second BBQ plate.

(11) Type in the BBQ’s location (address or suburb).

(12) Tap the Google Maps icon and allow location access. The latitude and longitude fields will fill in automatically.

(13) Add any notes you wish.

(14) Tap on ‘upload new image’ if you want to add a photo of the BBQ – recommended.

(15) Leave the ‘visible’ toggle on to see the asset in the asset list.

(16) Leave the ‘alert’ toggle on to receive email alerts. *premium subscription only

(17) Tap ‘Save’.

(18) Tap the three lines in the top-right corner to reopen the menu.

(19) Tap on ‘assets’ and then tap on ‘view assets’.

(20) Your BBQ plate should now appear in the asset list.

(21) Repeat these steps to add another plate (asset).
